SOFTWARE DEVELOPER

Strategic Data and Telecom, 1993 - Present

- Primary responsibilities include design and development of telecommunication call accounting software using VB.net, Visual Basic and Visual C++.
- Created and maintained five versions of call accounting software, from DOS version, 'TMS', written in C/C++, up to the current version '[ApogeeNet](#)', written primarily in VB.net
- Designed most database tables for all five versions
- Used MVC C# to write a Work Orders intranet program
- Wrote and designed an ASP.net reporting interface
- Knowledge of Crystal Reports used to design report
- Wrote a wide variety of programs: user interfaces, reports, database management, data manipulation, utilities, installation routines, DLLs and OCX controls
- Found dependable and trustworthy, allowed to telecommunicate since July 1994 out my home office
